MT-4008W

Ergonomic and Versatile Mobile POS

Extra Protection

Hand strap that comes with the hospitality package prevents the tablet from dropping on the ground accidentally and eases the use's fatigue during the hours of work.

the cumbersome issue of larger mobile devices.

Seamless Application Integration

Instead of the wide screen format found in the majority of the consumer tablets, MT-4008W comes with the POS industry standard 1024 x 768 resolution, which allows the existing POS applications to be ported over without any modification.

Long Hour Operation

MT-4008W is designed with advanced power saving technology that provides long battery life for daily operation. However, for retailers who require even longer battery life for more intensive usage, the pistol grip also houses a removable battery that can vastly extend the overall operating time.

Versatile Function

Another highlight of MT-4008W is the optional dock station, which has a 3" WIFI thermal POS receipt printer built-in, and connectivity options such as Serial ports, USB ports, LAN ports and CR ports. Once the tablet is integrated with its dock station, an all-in-one POS is instantly at your disposal. The MT-4008W offers more than just mobility but versatility.
